# Malewa Wildlife Lodge + Kigio Wildlife Camp

Outstanding Eco-lodges in the heart of the Great Rift Valley

## KIGIO WILDLIFE CONSERVANCY

Kigio Wildlife Conservancy is a noteworthy 3,500-acre conservancy between Nakuru and Naivasha in Kenya. The beautiful Conservancy with its wide ranging habitats, from riverine and euphorbia woodlands to short grass and Leleshwa shrub, holds approx. 3,500 heads of wildlife (including the endangered Rothschild Giraffe, a 200 strong herd of buffalo, impala, Grant's and Thomson's gazelle, eland, hyena, leopard, hippo and over 250 bird species) which are protected by an electric fence on three sides and the Malewa River on one. The Conservancy's rich bio-diversity has been recognized internationally by Tusk Trust, Born Free Trust, Lewa Wildlife Conservancy and several private donors who have provided funds to improve the infrastructure in the conservancy and to help wildlife conservation and surrounding communities. The Conservancy is at the forefront of eco-tourism in the Rift Valley lakes area. Accommodation is available at 2 new stunning properties - Malewa Wildlife Lodge and Kigio Wildlife Camp. Guests here are not restricted to day game drives only and can partake in complementary game walks and bike rides with knowledgeable local naturalists for a superb all-round safari experience. Night game drives are also possible and very rewarding.

## MALEWA WILDLIFE LODGE

The striking Malewa Wildlife Lodge is set within a glorious Yellow Acacia woodland along the Malewa River which attracts over 250 species of exotic birds. Once a rudimentary lodge, it has been transformed into a stunning luxury eco-lodge incorporating a dramatic architectural style and traditional African building methods and concepts. The mess area is a beautiful double-storey structure made up of a massive thatched roof covering games and relaxation areas on the upper deck and a lovely communal sitting area with fireplaces, dining room and bar on the ground level. A dramatic entrance to the lodge and a soaring mud clad chimney exemplifies the creativity of the designer Ben Jackson, who also designed Greystoke Mahale on the shores of Lake Tanganyika.

Accommodation is in 5 individual and traditional-styled buildings with 6 bedrooms (one is a 2-storey family cottage with 2 rooms) and 4 stunning river suites on stilts (including one honeymoon suite with outdoor bath), all offering spacious bedrooms with en-suite bathrooms within an acacia forest filled with wildlife. To comply with the eco-footprint, electricity is generated by solar power, waste recycled, water drawn using hydro power, hot water supplied by efficient 'kuni' boilers, cooking done with gas and eco-bricks from sustainable sources and food sourced from local farmers. The lodge and the conservancy will work closely with the surrounding communities to offer wildlife courses, placements to students and assistance to schools, clinics and local enterprise. Malewa Wildlife Lodge is a very special retreat. Here guests can enjoy an all-encompassing nature experience that includes gentle walks with expert naturalists, fishing, biking, bush breakfasts or lunches besides day or night game drives. A minimum of 2 nights stay is recommended but several guests have commented that they would have preferred to stay much longer.

**Malewa Wildlife Lodge is available on Game Package basis with all activities, house drinks, laundry, return naivasha airstrip transfers included in the rates. (See rate sheet for details)**

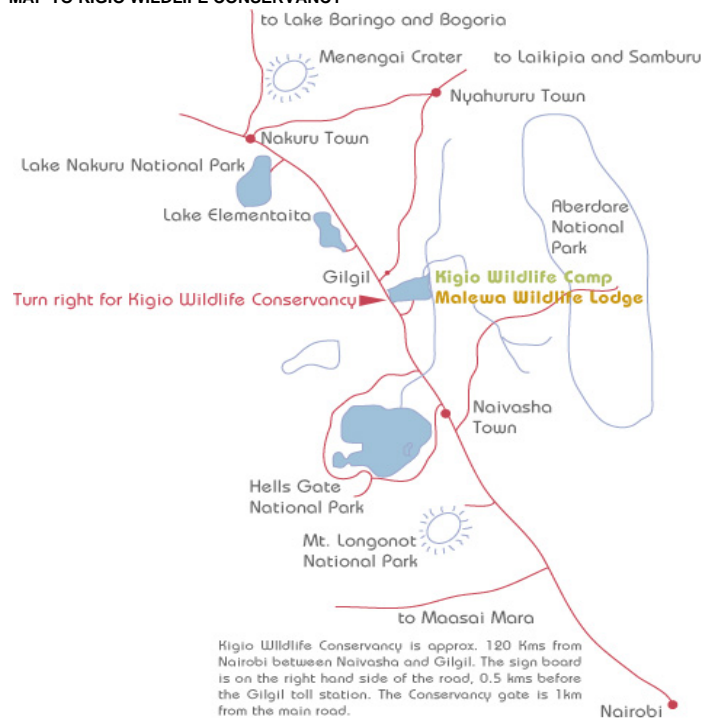

## KIGIO WILDLIFE CAMP

Kigio Wildlife Camp is now open. Only 1km from Malewa Wildlife Lodge, it is a superb all-suite camp surrounded by a beautiful Yellow-fever tree woodland overlooking the Malewa River. The camp is constructed from sustainable pine-wood, local earth from the conservancy, traditional thatch provided by the surrounding community and canvas panels - there has been minimal usage of cement and steel and the environment has been carefully preserved during its construction. Power is provided by solar panels.

Accommodation is in eleven spacious suites (each 72 sq mt) and one 2-bedroom family suite, each built on deck and containing a large bedroom and sitting area, a private bathroom with flush loo, shower and balcony. The dining area is situated in a glade overlooking a towering red cliff that houses colonies of bee-eaters. A most attractive bar sits between two tall fever trees facing the cliff while dining decks are extended up to the river. At night hippo and buffalo visit the camp to feed on ground salts and vegetation, in the morning zebra and giraffe wander through as more than 250 types of birds sing away. Kigio Wildlife Camp not only offers some of the highest standards of accommodation in the Rift valley lakes area but also a rewarding experience. Guests can partake in complimentary nature walks with naturalists, fishing and biking. Optional 4x4 day and night game drives are equally rewarding with a chance to see aardvark, aardwolf and caracal. A minimum of 2 nights stay is recommended at the camp - Kigio is great fun.

**Kigio Wildlife Camp is available on Full Board basis with some activities included in the rates. (See rate sheet for details)**
